Professional Voice Over and Audio Production Services

Summary

Steve creates and produces voice overs and jingles for commercial, private and educational institutions. He produces 1080p videos for business clients, museums and educational institutions and well as some of his own short films. Steve has 40 years of professional audio recording and editing experience with professional equipment. He has 11 years of graphics/ad and website design for business clients.

Background and Experience

18 years with Ampex Corporation New Product Development Engineering, designing state-of-the-art broadcast/studio audio and video recorders. He is an acclaimed artist, as well as a musician, technical advisor and entrepreneur. He is known for his professional communication skills and a reputation for personal integrity and innovation.

Skills

Voice overs for radio, television, animation, business, documentaries, educational, internet video, podcasting and videogames.

Proficient in professional audio recording, editing, broadcast conformity, video editing, color correction and encoding/rendering using the full and most current version of Adobe Creative Cloud suite.

Voice over files are normalized to -3db with zero clipping or distortion, and edited in Adobe Audition CC to remove all breath and mouth sounds. Audio files are created to your spec, up to lossless 24 bit 48khz sample rate.

Ability to create a voice track and sync to your video using Adobe Premiere Pro and Audition.

Create jingles with my voice over for your ads, commercials, PSAs, etc.

Languages: English (North American)
